

Exterior Deep Cleaning Services

Exterior Railings and Doorframes

Exterior Walls and Ledges

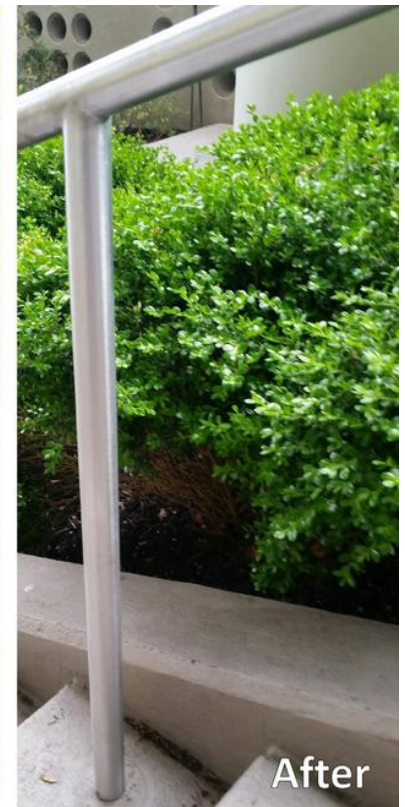

Exterior Facades

KC Restoration can deep clean and restore almost any type of exterior surface including limestone and metal. We employ proprietary methods and specialty deep cleaning materials that kill biological growth and atmospheric staining. These services provide an extended period of a clean appearance. Highly conscious of the long-term damage high volume water and chemical use can do, our team uses appropriate amounts of water, a hot water system and environmentally safe solutions.

Exterior Deep Cleaning Services

If your facility is in need of "deep clean" services for neglected exterior walls, handrails or entrance doors, KC Restoration can help.
