

Metal Refinishing & Maintenance Project

Location: 2555 Grand Blvd,
Kansas City, Missouri

Type of Metal: Mirror Finish
Stainless Steel

High profile downtown office building improves exterior impression with a professional maintenance plan that ensures the metal surfaces remain shiny.

Problem: Exposure to outdoor elements and foot traffic created discoloration, scratches and dirty metal surfaces .

Solution: KC Restoration worked with our customer to create a maintenance plan of scratch removal and refinishing services in combination with cleaning visits to ensure the metal continues to shine and provide a gleaming and inviting first impression.
