Professional graffiti services you can trust:

- The KCR team of experts only uses products made specifically for graffiti removal that will not damage exterior stone, brick, metal, or precast concrete surfaces.
- Our products will not bond graffiti stains to the surface or harm the surface.
- Our experienced personnel can often remove most graffiti stains through an in-depth cleaning process.
- KCR applies a specialized coating that prevents graffiti paint from adhering to the surface and makes cleaning the surface easier.

KCR utilizes the latest technology to provide high-quality refinishing services for metal, stone, and wood surfaces and deep cleaning services for facades, exteriors, and escalators. Our processes and procedures increase the value, improve the impression and maintain the appearance of your facility.

If your facility is in need of graffiti services, KCR can help.
